Backflow and Cross Connection Service Agreement

Cheniere-Drew Water System is responsible for protecting the drinking water supply from contamination or pollution which could result from improper private water distribution system construction or configuration. The purpose of this service agreement is to notify each customer of the restrictions which are in place to provide this protection. The utility enforces these restrictions to ensure public health and welfare. Each customer must sign this agreement before water service is provided to the customer. This Policy addresses the State of Louisiana Sanitary Code (LAC Title 51:XII and Title 17:1) that states a public water system shall have no uncontrolled cross-connection to a pipe, fixture, or supply, any of which contain water not meeting provisions of the safe drinking water regulations.

Restrictions:

- A. Customer agrees there shall at no time be more than one (1) water service connected to the water service meter and/or water service line. This includes houses, mobile homes, travel trailers, etc.
- B. No direct connections between the water supply and a potential source of contamination is permitted.
- C. Potential sources of contamination shall be isolated from the Cheniere-Drew Water Supply by air-gap or appropriate backflow prevention device.
- D. The customer shall be responsible for ensuring that no cross connection exists without approved backflow protection within the customer's premises starting at the point of service from Cheniere-Drew Water System.
- E. The customer, at his/her own expense shall correct any malfunctions of a backflow protection device or method that occurs or has been found to occur, or is revealed by periodic testing.
- F. Swimming Pool owners are required to install hose bib vacuum breakers for pools filled by garden hose.
- G. To make sure that no harmful materials are drawn back into the garden hose, a vacuum breaker should be installed on each hose bib.

ENFORCEMENT

If the customer fails to comply with the terms of the Service Agreement, the Water System shall, at its option, either terminate water service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any and all expenses associated with the enforcement of this agreement shall be billed to the customer.

The customer agrees to comply with the requirements of the Louisiana State Board of Health that no other present or future source of water will be connected to any water lines served by Cheniere-Drew Water System Water, and will disconnect from any present water supply prior to connecting to Cheniere-Drew Water System.

I have read and fully understand this agreement.
